

Data Sheet  
High Performance Door  
**RapidRoll® 300**

The modular door:  
You define the setup - we build your door!

Room and climate partition.

Stainless steel version for hygienic demands.

Machine protection and materials handling.

Next generation in High  
Performance Door control systems

# High Performance Door RapidRoll® 300

## One product Three Faces

RapidRoll® 300 S Galvanized Steel

RapidRoll® 300 A Aluminum

RapidRoll® 300 I Stainless Steel

## ADVANTAGES OF ALBANY RAPIDROLL® 300

- Modular system allows custom configurations
- Fast opening and closing speed saves energy costs
- Space saving construction for almost unlimited possibilities of installation
- Fast and simple installation
- Maintenance-friendly design resulting in minimal service costs

## APPLICATION

- Interior
- Hygienic environments
- Machine Protection
- Various manufacturing and materials handling applications

## DESIGN

- Flexible modular design
- Custom configured to each application
- Motor cover available in plastic, powder coated steel or stainless steel
- Optional top roll cover available in galvanised steel, aluminium or stainless steel

## DOOR CURTAIN

- Available in various materials and colours
- Wind tabs enhance wind resistance

## KNOCK-OUT CAPABILITY

- Available from 1300 mm width
- Sensor stops door immediately upon impact
- Prevents damage to the bottom beam
- Easily manual reset

## DRIVE UNIT

Hollow shaft gear motor with drop down safety gearbox (not 300 Mini), can be positioned on the right or left side of the door.

## CONTROL SYSTEM

Choice of one of the following three systems:

- ACS 25 for RapidRoll® 300 galvanized steel
- ACS 50 for RapidRoll® 300 S, A, I and Mini
- MCC<sup>VectorControl</sup> for RapidRoll® 300 S, A and I

## MANUAL ACTIVATION

The door can be operated manually with a crank in the event of a power failure.

## SAFETY FEATURES

The door is designed according to the Workplace Directive of the UVV regulations and the harmonized CE Guidelines including the EN 13241-1.

## INDICATION OF RISK

The security of the door is designed for normal use and for vehicles in an industrial environment corresponding to the harmonized CE-Guidelines. In consideration of the on site situation – especially in case of pedestrian use – additional safety measures, such as additional actuators may be required. In addition, special environmental conditions may impact the choice of door type. For more information or to schedule an on-site inspection, please contact an Albany Door Systems sales engineer.

## MATERIAL

- galvanised steel
- aluminium
- stainless steel

## MOTOR POSITION

available left or right hand side

## MOTOR COVER <sup>1)</sup>

- standard door is delivered without motor cover
- as option, motor cover can be chosen:
  - plastic (blue or black)
  - powder coated steel
  - stainless steel

## CONTROL BOX

- depending on requirements for opening/closing speed and actuators, three different control systems can be chosen from a basic control system ACS 25 to the innovative frequency converter control system MCC<sup>VectorControl</sup>

## KNOCK-OUT CAPABILITY <sup>2)</sup>

- available for width  $\geq 1300$  mm
- avoids non-operation times after crash
- easy manual reset after an impact

## TOP ROLL

- aluminium roll with galvanised shafts
- options:
  - aluminium roll with shafts and bearing in stainless steel
  - top roll and shafts made from stainless steel

## TOP ROLL COVER <sup>1)</sup>

- standard door is delivered without top roll cover
- as option, top roll cover can be chosen from:
  - galvanised steel
  - aluminium
  - stainless steel

## DOOR CURTAIN CHOICES INCLUDE:

- clear PVC with reinforcement stripes
- Travitop
- RollTex®
- NomaTex®

## COLOURS

- basic colours red and blue
- large variety of other colours on request, depending on choice of door curtain material

## WINDOWS

- standard for door curtains from clear PVC with coloured reinforcement stripes
- options for other types of curtain:
  - NomaTex® with windows or vision panel
  - RollTex® with windows

## SAFETY FEATURES

- self testing electrical safety edge
- door line photocell

## BOTTOM PROFILE

- aluminium
- stainless steel
- low bottom profile for doors with reduced space requirement over lintel (only alu)

## ACTUATORS

Individual applications can include additional safety devices. Actuators such as infrared, radar detectors, push buttons, vehicle detector loops or radio transmitters can be added to the control system. Please contact us for additional information for your specific needs.

Notes:

<sup>1)</sup> For doors of height  $\leq 2500$  mm the use of top roll and motor cover is required according to standard EN 13241-1.

<sup>2)</sup> Not applicable in version „mini“ with low bottom profile for reduced installation height.

Products shown may include additional options.

## Frequency converter control system MCC<sup>VectorControl</sup>

The MCC control unit is mounted under the drive unit. Easy wiring by pluggable connections.

Compact frequency converter control system with vector control technology for smooth operation of the door.

Display unit in a small box placed at the side frame.

Display unit with foil keys and a graphical display offering easy operation and maintenance.

Products shown may include additional options.
